

Dear **Colleague dear Friend,**

I am writing to update you on the **International Workshop on Multiple Endocrine Neoplasia (IWMEN) 2012** that will be held in **Liège, Belgium on September 5-8, 2012**. I'm happy to say that the IWMEN 2012 has recently been joined by a number of major pharmaceutical and biotechnology industry partners. As part of this partnering, I want to inform you of a new Satellite Symposium that will be sponsored and organized by IPSEN on the evening of September 5th, 2012.

The topic of this symposium is "**Defining the best candidates for somatostatin analogue treatment in NET in 2012 and beyond**", and is chaired by Prof. Bertram Wiedenmann from Berlin, Germany. The symposium will involve three separate, highly-regarded speakers who will deal with themes relating to the best use of somatostatin analogues in the management of neuroendocrine tumors (NET):

- **MEN1: a model for predicting the course of pNET** (Gerlof Valk, Utrecht, NL)
- **Predictors of tumor response in NET patients treated with SSAs** (Eric Baudin, Villejuif, FR)
- **How will the management of NET with SSA evolve in the future?** (Ivan Borbath, Louvain, BE)

These themes are central to the clinical management in many patients with MEN1 and also sporadic NET. As such, we know that it will be of great relevance and interest to the IWMEN 2012 attendees, given that this topic is truly at the interface of endocrinology and oncology.

As before, I invite you to attend the IWMEN 2012 meeting to avail yourself of the significant opportunity to interact with many of the world's leading experts on genetic and inherited endocrine neoplasia syndromes. You can read the Program and register for the meeting at [www.iwmen.org](http://www.iwmen.org). I will be in touch with you soon again with further important updates on the IWMEN 2012 meeting and I look forward to welcoming you to Liège in September.

**Prof. Albert Beckers,**

Chairman, Local Organizing Committee

## Registrations

On the registration website you will be able to register.

Registration website: [www.iwmen.org/event/Liege2012](http://www.iwmen.org/event/Liege2012)

... or use [this link](#) to access the registration page directly.

For any questions on the 13th International Workshop on Multiple Endocrine Neoplasia, please do not hesitate to contact us at: [registration@iwmen.org](mailto:registration@iwmen.org)
