

Dear Colleagues , dear Friends

As a follow-up to my letter from last September, I wanted to update you about the 13th International Workshop on Multiple Endocrine Neoplasia (IWMEN) to be held in Liège on September 5 to 8, 2012. The program has now been finalised and I am delighted to say that we have an erudite group of speakers, who will deal with many key aspects of the science and therapeutics of hereditary endocrine cancers and syndromes. Furthermore this IWMEN meeting is multi-disciplinary and there is much to interest not only endocrinologists and oncologists, but also gastroenterologists, geneticists, endocrine surgeons and molecular biologists. The IWMEN web site is up and running and there you can read the program in detail, while also taking the chance to register early at a discounted cost. Do keep an eye on the website for important updates and announcements, such as the opening of abstract submission. Please don't hesitate to forward this message to friends or colleagues who may be interested or to establish a link with hospital, university or other informational websites that fall under your responsibility.

The IWMEN meeting website can be accessed at the following address:

<http://www.iwmen.org/event/Liege2012/>

I look forward to welcoming you to Liège in September!
